

How to Stop Moisture Damage in Your Stucco and Stone Homes

The Challenge

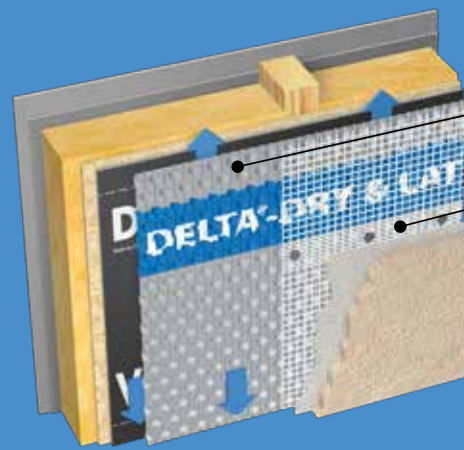

The damaging effects of moisture can destroy your stucco and stone homes – and your reputation.

Moisture can result in:

The 2-in-1 Solution

Innovative DELTA®-DRY & LATH 2-in-1 rainscreen effectively drains and dries to provide superior long term protection.

DELTA®-DRY rainscreen
+
Pre-installed fiberglass lath

DELTA®-DRY & LATH

3 Reasons to Choose DELTA®-DRY & LATH

1

Air-gap Technology

Using DELTA®-DRY's channeled polyethylene sheeting that dries and drains, DELTA®-DRY & LATH blocks solar-driven moisture and allows any moisture from within the wall to dry.

2

Cuts labor time

It eliminates one whole step from your installation. DELTA®-DRY rainscreen is combined with a fiberglass lath instead of metal, which also makes it lightweight and easier to cut.

3

Saves you money

A better-protected home means fewer costly call-backs. DELTA®-DRY & LATH lasts longer and goes on faster.

Don't let moisture ruin your homes or your reputation.
